

Revenue Cycle Management

Healthcare organizations are under constant pressure to deliver higher quality care in an environment of stricter reimbursement mechanisms while catering to larger patient populations. Reimbursement can be affected by a number of factors including the claims process, denials, audits, and legislation. Errors or omissions in any one of such factors can extend the revenue cycle or seriously reduce the reimbursement, thereby inducing adverse stress on the organization’s operating margin.

Data-Core offers business process services and technology solutions to help healthcare organizations transition to an environment that is patient-focused, streamlined and efficient. Over the years, Data-Core has built up a comprehensive suite of services for Providers and maintains a proven track record of providing end-to-end solutions to effectively manage the complete ecosystem.

Payment Assurance Services

- Coverage Discovery**
